

# Westbound Train

New Coon Creek Girls

          C                                  F  
Stopped down by the depot this morning

          C                                  G  
But the train had already gone

          C                                  F  
The man said the train

          C                                  F  
Just coasted on through

C                                  G                                  C  
Dropped the mail and moved on

## CHORUS

          G          C  
If he's ever coming back

          F                                  C  
I wish it was now that he did

                                  F          C                                  F  
I checked every train sunshine or rain

C                                  G                                  C  
I guess he don't like westbound trains

He boarded an eastbound last season  
And this is the place where I stood  
And waved as he rode off into the sunrise  
He could ride one back if he would

## CHORUS

          G          C  
If he's ever coming back

          F                                  C  
I wish it was now that he did

                                  F          C                                  F  
I checked every train sunshine or rain

C                                  G                                  C  
I guess he don't like westbound trains
